

Dear ICI Provider

**Important Clarification about the ICI Procedure codes listed in CareConnection and the ASO Service Grid.**

- The ICI procedure codes were incorrectly displayed in the service grid and CareConnection. This has been corrected in CareConnection and will be corrected in the next revision of the Service Grid.
  - The Incorrect Current Code is: CBB17-ICIS. The Correct Code to use for MaineCare billing is CBB17
  - Additional code, with the adoption of the revised Section 17 rules: the incorrect code is: CBB17-AF-ICIS. the correct code is CBB17 with AF modifier.
- **Even though the codes displayed incorrectly in the notification download, the correct codes were entered and approved in MECMS for billing purposes.**
- The additional code for ICI services (CBB17 with modifier AF) will be accepted for billing by MaineCare, when the revised Section 17 rules are adopted.
- Providers must comply with all MaineCare requirements when using any new procedure code. Please contact MaineCare Provider Relations if you have questions about whether you should be using this code or not.
- The current estimate for the revised Section 17 to be adopted is 1/1/08.

**Before submitting claims to MaineCare for ICI services provided in January, please make sure of the following:**

- Verify which procedure code you should be using for billing services provided in January
- Even though CareConnection was incorrectly displaying the ICI procedure codes in the notification download, please make sure you submit the correct codes in your billing.
- If you requested the wrong ICI code from APS Healthcare, please resubmit the registration with APS Healthcare to request the correct code.
- Do not submit a claim to MaineCare with the CBB17 with AF modifier, prior to the revised Section 17 rules being adopted, or the claim will suspend.
